Subject Index 1986

Numbers following items designate the month of issue and page number. Thus, 6:30 means page 30 of the June issue.

A

Abrasive, mass-finishing methods, refining plastic surfaces, 4:37
ABS, honing molding parameters, flow length measurement, 6:41
ABS/polycarbonate, injection-molded parts, more realistic testing, 1:43
Acetal resins, engineering resins, new compact E/E designs, 1:17
Acrylamate composites, large, high-modulus reinforced structural parts, 2:29
Acrylic, high-rubber MBS modifier, strong and clear PVC, 9:45
Additives
antistats for polyolefins, ethyoxylates, 8:41
colorants and high technology, performance, 10:21
engineering resins, specialty applications, 6:31
February roundup, 2:33
flame-retardant system, physical performance market, 4:29
fluorocarbon elastomer, polyolefin extrusion, 2:63
high-rubber MBS modifier, strong and clear PVC, 9:45
lignocellulosic, organic fillers and resins, 12:27
November roundup, 11:43
PVC formulations, curbing smoke and flame, 1:47
race for the compounding business, 2:19
roundup, 5:43
toughening weld lines, mica-reinforced PP parts, 7:41
weathering and color, predicting the effects, 5:35
Adhesion, alloys and blends, marketing momentum, 7:19
Adhesives, alternate, food-packaging laminates, 8:61
Agricultural by-products, as fillers, 12:27
Alloys
blends and, marketing momentum, 7:19
plastics, making dream cars come true, 5:19
Aluminum flake, high-aspect ratio EMI fillers, 5:39
Annealing, injection-molded parts, more realistic testing, 1:43
Annual Technical Conference (ANTEC)
forum on technology, 7:35
"Plastics-Value Through Technology", 3:19
Antifogging agent, additives, engineering resins, specialty applications, 6:31
Antimony trioxide, PVC formulations, curbing smoke and flame, 1:47
Antioxidants, additives roundup, 5:43
Antistat
additives, engineering resins, specialty applications, 6:31
polyolefins, ethoxylates, 8:41
Appearance
advances, automotive applications, 7:72
weathering and color, predicting the effects, 5:35
Applications
engineering resins, material choices, design concepts, 9:27
thermoplastic elastomers, design choices, 11:37
Aspect ratio, high, EMI fillers, 5:39
Assembly, how to bond polycarbonate parts, solvent welding, 6:53
Automation, machines and controls, creation of new synergisms, 12:19
Automotive plastics
alloys and blends, marketing momentum, 7:19
ANTEC 1986, forum on technology, 7:35
color advances, 7:72
making dream cars come true, 5:19
plastic auto parts, polyurethane coatings, 12:31
U.S. industry, "new quality", 4:19
Awards, SPE's Plastics in Automotive Division, 12:44

B

Barrel, mass-finishing methods, refining plastic surfaces, 4:37
Barrier properties
oxygen boost, metalizing film, 7:31
treated HDPE containers, solvent permeation resistance, 4:33
Barrier resins
making barrier sheets, putting regrind to work, 2:25
plastics food packaging, 3:57
plastics packaging, delivering the goods, 5:29
Bisphenol-A, polycarbonate copolymers, monomer selection and control, 6:49
Blends, alloys and, marketing momentum, 7:19
Blowmolding
distributed machine controls, 11:31
dual blowing agents, cost of polystyrene foams, 6:45
engineering resins, material choices, design concepts, 9:27
treated HDPE containers, solvent permeation resistance, 4:33

C

Carbon dioxide, dual blowing agents, cost of polystyrene foams, 6:45
Carbon fibers, additives roundup, 2:33
Char formation, PVC formulations, curbing smoke and flame, 1:47
Chemical resistance, injection-molded parts, more realistic testing, 1:43
Coatings
polyurethane, plastic auto parts, 12:31
urethane, gel permeation chromatography, testing, 10:33
Coextrusion
making barrier sheets, putting regrind to work, 2:25
sheets, polycarbonate, 3:67
Color
advances, automotive applications, 7:72
stabilizer action in PET, quick test, 2:37
Colorants
additives, engineering resins, specialty applications, 6:31
additives roundup, 2:33, 5:43
color concentrates, dye pigments, precolored materials, 10:21
weathering and, predicting the effects, 5:35
Composites
alloys and blends, marketing momentum, 7:19
engineering resins, new compact E/E designs, 1:17
Compounding
high-aspect ratio EMI fillers, 5:39
highly-competitive business, 2:19
stabilizer action in PET, quick test, 2:37
U.S. industry, "new quality", 4:19
vinyl technology II, Regional Technical Conference, 8:97
Computer-integrated manufacturing, microprocessor control, blowmolding, 11:31
Computers
machines and controls, creation of new synergisms, 12:19
selection of resins and processes, 10:43
Conductive fillers, additives, engineering resins, specialty applications, 6:31
Conference, ANTEC 1986, forum on technology, 7:35
Controls, machines and, creation of new synergisms, 12:19
Conversion operations, running LLDPE blown film, 1:37
Curing, ultraviolet light, GPC, urethanes, 10:33

D

Degassing, melt devolatilization, choosing an extruder, 7:47
Degradation, stabilizer action in PET, quick test, 2:37
Design
alternate adhesives, food-packaging laminates, 8:61
barrier resins, plastics food packaging, 3:57
computer program selection, resins and processes, 10:43
engineering resins, material choices, 9:27
how to bond polycarbonate parts, solvent welding, 6:53
making barrier sheets, putting regrind to work, 2:25
metalizing film, oxygen barrier properties, 7:31
plastics, making dream cars come true, 5:19
plastics packaging, 5:29
polyurethane topcoats, plastic auto parts, 12:31
treated HDPE containers, solvent permeation resistance, 4:33
Devolatilization, melt, choosing an extruder, 7:47
Die, design, running LLDPE blown film, 1:37
Dusseldorf Trade Fair, K-86, 9:37

E

Elastomers, thermoplastics, design choices, 11:37
Electromagnetic radiation, weathering and color, predicting the effects, 5:35
Electrostatic charge, antistats for polyolefins, ethoxylates, 8:41
EMI/RFI shielding
additives, engineering resins, specialty applications, 6:31
engineering resins, new compact E/E designs, 1:17
high-aspect ratio EMI fillers, 5:39
race for the compounding business, 2:19
Engineering plastics, polycarbonate copolymers, monomer selection and control, 6:49
Engineering resins
alloys and blends, marketing and momentum, 7:19
material choices, design concepts, 9:27
new compact E/E designs, 1:17
race for the compounding resins, 2:19
Esters, polycarbonate copolymers, monomer selection and control, 6:49
Ethoxylates, antistats for polyolefins, 8:41
Ethylene dioxide, how to bond polycarbonate parts, solvent welding, 6:53
Ethylene-propylene, thermoplastic vulcanizates, vacuum thermoforming, 9:49
Ethylene vinyl alcohol
barrier resins, plastics food packaging, 3:57
coextruded sheets, polycarbonate, 3:67
plastics packaging, delivering the goods, 5:29
Ethyl vinyl acetate, melt devolatilization, choosing an extruder, 7:47
Extrusion
choosing an extruder
add-on mixers, 10:39
melt devolatilization, 7:47
high-aspect ratio EMI fillers, 5:39
polyolefin, fluorocarbon elastomer, 2:63
Extrusion blown film, running LLDPE blown film, 1:37
Extrusion compounding, Regional Technical Conference, 1:73

F

Fillers/reinforcements
additives, engineering resins, specialty applications, 6:31
additives roundup, 2:33, 5:43
high-aspect ratio EMI fillers, 5:39
high-sorption, lignocellulosic, 12:27
new RIM composite, 2:29
reinforced plastics, record year, 4:41
Film
barrier sheets, putting regrind to work, 2:25
blown, resin processibility, viscosity ratio, 12:35
coextruded sheets, polycarbonate, 3:67
high-density polyethylene, expectations for growth through 1990, 1:33
Finishing, mass-finishing methods, refining plastic surfaces, 4:37
Flame retardants
additives, engineering resins, specialty applications, 6:31
additives roundup, 2:33, 5:43
physical performance market, 4:29
PVC formulations, curbing smoke and flame, 1:47
Fluorine, treated HDPE containers, solvent permeation resistance, 4:33
Foams, polystyrene cost, dual blowing agents, 6:45

G

Gel permeation chromatography, testing, troubleshooting urethanes, 10:33
Glass fibers
high-aspect ratio EMI fillers, 5:39
reinforced plastics, record year, 4:41
Glass fillers: *see also* Fillers/reinforcements, liquid-crystal polymers, how to process, 12:39
GPC: *see* Gel permeation chromotography
Grafts, high-rubber MBS modifier, strong and clear PVC, 9:45

H

Hardwood, refining plastic surfaces, mass-finishing methods, 4:37
HDPE: *see* High-density polyethylene
Heat-aging, injection-molded parts, more realistic testing, 1:43
High-density polyethylene
expectations for growth through 1990, 1:33
fluorocarbon elastomer, polyolefin extrusion, 2:63
polyolefin thermoforming, setting conditions, 8:53
treated containers, solvent permeation resistance, 4:33

I

Impact modifiers
additives, engineering resins, specialty applications, 6:31
MBS, strong and clear PVC, 9:45
Injection molding
alloys and blends, marketing momentum, 7:19
machines and controls, creation of new synergisms, 12:19
more realistic parts testing, 1:43
reaction, new composite,, 2:29

K

K-86, Dusseldorf Trade Fair, 9:37

L

Laminates, food-packaging, alternate adhesives, 8:61
Lamination, metalizing film, oxygen barrier properties, 7:31
Lignin, reactivity, high-sorption fillers, 12:27
Linear low-density polyethylene
fluorocarbon elastomer, polyolefin extrusion, 2:63
running blown film, 1:37
Lignocellulosic, high sorption fillers made from, cost effectiveness, 12:27
Liquid crystal polymers, engineering resins, new compact E/E designs, 1:17
LLDPE: *see* Linear low-density polyethylene
Lubricants, polyolefin extrusion, fluorocarbon elastomer, 2:63

M

Machinery
controls and, creation of new synergisms, 12:19
race for the compounding business, 2:19
Machinery exhibit, K-86, 9:37
Marketing
barrier resins, plastics food packaging, 3:57
design concepts, consumer and industrial applications, engineering resins, 9:27
engineering resins, new compact E/E designs, 1:17
high-density polyethylene, expectations for growth through 1990, 1:33
momentum, alloys and blends, 7:19
plastics, making dream cars come true, 5:19
race for the compounding business, 2:19
reinforced plastics, record year, 4:41
thermoplastic elastomers, design choices, 11:37
U.S. industry, "new quality", 4:19
Materials
alloys and blends, market momentum, 7:19
demand for new materials, 11:21
engineering resins, new compact E/E designs, 1:17
liquid-crystal polymers, how to process, 12:30 new RIM composite, 2:29
nylon as reinforcement, polyurethane systems, 9:53
plastics, making dream cars come true, 5:19
polycarbonate copolymers, monomer selection and control, 6:49
process selection, computer program, resins, 10:43
race for the compounding business, 2:19
MBS, high-rubber modifier, strong and clear PVC, 9:45
Media, mass-finishing methods, refining plastic surfaces, 4:37
Medical plastics
future needs, Regional Technical Conference, 7:73
how to bond polycarbonate parts, solvent welding, 6:53
Melt index, resin processibility, viscosity ratio, polyethylenes, 12:35
Melt temperature, honing molding parameters, flow length measurement, 6:41
Metalization, film, oxygen barrier properties, 7:31
Methacrylate, high-rubber MBS modifier, strong and clear PVC, 9:45
Methylene chloride, how to bond polycarbonate parts, solvent welding, 6:53
Mica, reinforced PP parts, toughening weld lines, 7:41
Mineral fillers: *see also* Fillers/reinforcements, liquid-crystal polymers, how to process, 12:39
Miscibility, alloys and blends, marketing and momentum, 7:19
Mixers, add-on, extruder performance, 10:39
Molding
parameters, flow length measurement, 6:41
resin transfer, nylon as reinforcement, polyurethane systems, 9:53

N

Nickel-coated graphite, high-aspect ratio EMI fillers, 5:39
Nylon
as reinforcement, polyurethane systems, 9:53

colorants and high technology, performance, 10:21
engineering resins, new compact E/E designs, 1:17
plastics packaging, delivering the goods, 5:29

O

Orientation
metalizing film, oxygen barrier properties, 7:31
stretch, PVC bottles, 8:47

P

Packaging
ANTEC 1986, forum on technology, 7:35
delivering the goods, 5:29
food
alternate adhesives, 8:61
barrier resins, 3:57
PVC bottles, 8:47
making barrier sheets, putting regrind to work, 2:25
metalizing film, oxygen barrier properties, 7:31
polycarbonate, coextruded sheets, 3:67
treated HDPE containers, solvent permeation resistance, 4:33
Paneling, treated HDPE containers, solvent permeation resistance, 4:33
PEEK: *see* Polyetheretherketone
Pentaerythritol diphosphite ester, stabilizer action in PET, quick test, 2:37
PES: *see* Polyethersulfone
PET: *see* Polyethylene terephthalate
Pigmentation, weathering and color, predicting the effects, 5:35
Pigments
additives, engineering resins, specialty applications, 6:31
organic, colorants and high technology, performance, 10:21
Plasticizers
additives, engineering resins, specialty applications, 6:31
additives roundup, 2:33
Plastics South, SPI/SPE Plastics Show & Conference, Atlanta, 11:47
Polycarbonate
coextruded sheets, 3:67
copolymers, monomer selection and control, 6:49
demand for new materials, 11:21
how to bond parts, solvent welding, 6:53
Polyester
thermoplastic, engineering resins, new compact E/E designs, 1:17
thermoplastic elastomers, design choices, 11:37
Polyetheretherketone, engineering resins, new compact E/E designs, 1:17
Polyethersulfone, engineering resins, new compact E/E designs, 1:17
Polyethylene
plastics packaging, delivering the goods, 5:29
viscosity ratio, resin processibility, 12:35
Polyethylene terephthalate
demand for new materials, 11:21
engineering resins, new compact E/E designs, 1:17
plastics packaging, delivering the goods, 5:29
stabilizer action evaluation, quick test, 2:37
Polyolefins
antistats, ethyoxylates, 8:41
resin processibility, viscosity ratio, 12:35
thermoforming, setting conditions, 8:53
Polyphenylene ether resins, engineering resins, new compact E/E designs, 1:17
Polyphenylene oxide, polyphenyl ether alloys, injection-molded parts testing, 1:43
Polypropylene
flame-retardant system, physical performance market, 4:29
fluorocarbon elastomer, polyolefin extrusion, 2:63
metalizing film, oxygen barrier properties, 7:31
polyolefin thermoforming, setting conditions, 8:53
toughening weld lines, 7:41
Polystyrene, lower cost of foams, dual blowing agents, 6:45
Polysulfone
polycarbonate copolymers, monomer selection and control, 6:49
resins, new compact E/E designs, 1:17
Polyurethane
alternate adhesives, food-packaging laminates, 8:61
coatings, plastic auto parts, 12:31
demand for new materials, 11:21
making dream cars come true, 5:19
systems, nylon as reinforcement, 9:53
Polyvinyl chloride
bottles, 8:47
formulations, curbing smoke and flame, 1:47
plastics packaging, delivering the goods, 5:29
strong and clear, high-rubber MBS modifier, 9:45
Polyvinylidene chloride
barrier resins, plastics food packaging, 3:57
making barrier sheets, putting regrind to work, 2:25
plastics packaging, delivering the goods, 5:29
Pressure, honing molding parameters, flow length mesurement, 6:41
Processing
add-on mixers, extruder performance, 10:39
aids
additives roundup, 2:33, 5:43
engineering resins, specialty applications, 6:31
fluorocarbon elastomer, polyolefin extrusion, 2:63
blowmolding, distributed controls, 11:31
choosing an extruder, melt devolatilization, 7:47
coextruded sheets, polycarbonate, 3:67
dual blowing agents, polystyrene foam cost, 6:45
high-aspect ratio EMI fillers, 5:39
liquid-crystal polymers, 12:39
new RIM composite, 2:29
polyolefin thermoforming, setting conditions, 8:53
resin, viscosity ratio, polyethylenes, 12:35
running LLDPE blown film, 1:37
thermoplastic vulcanizates, vacuum thermoforming, 9:49
U.S. industry, "new quality", 4:19
vinyl technology II, Regional Technical Conference, 8:97
PVC: *see* Polyvinyl chloride

Q

Quality control, U.S. industry, 4:19

R

Radio frequency, engineering resins, new compact E/E designs, 1:17
Recycling, barrier sheets, putting regrind to work, 2:25
Regional Technical Conference
color advances, automotive applications, 7:72
effective extrusion compounding, 1:73
plastics for tomorrow's medical needs, 7:73
thermoset technology, 2:55
vinyl technology II, compounding, processing and properties, 8:97
Reinforced materials, demand for new materials, 11:21
Reinforced plastics, additives, November roundup, 11:43
Reinforcements: *see also* Fillers/reinforcements, additives, engineering resins, specialty applications, 6:31
Research and development, U.S. industry, "new quality", 4:19
Resins: *see also* specific type
engineering
demand for new materials, 11:21
new compact E/E designs, 1:17
liquid-crystal polymers, how to process, 12:39
organic fillers and, cost effectiveness, 12:27
selection by computer program, 10:43
transfer molding, nylon as reinforcement, polyurethane systems, 9:53
Retrofitting, running LLDPE blown film, 1:37

S

SBR, high-rubber MBS modifier, strong and clear PVC, 9:45
Scrap reduction, U.S. industry, "new quality", 4:19
Screws
design
choosing an extruder, melt devolatilization, 7:47
coextruded sheets, polycarbonate, 3:67
running LLDPE blown film, 1:37
Sheet
barrier, putting regrind to work, 2:25
coextruded, polycarbonate, 3:67
Silicone, flame-retardant system, physical performance market, 42:29
Smoke suppressants, PVC formulations, curbing smoke and flame, 1:47
Society of Plastics Engineers
Annual Report, 5:49
ANTEC 1986, forum on technology, 7:35
1986-87 international officers, 4:48
K-86, 9:37
Society of the Plastics Industry
reinforced plastics, record year, 4:41
SPE Plastics Show and Conference-South, Atlanta, 11:47
Solubility, dual blowing agents, cost of polystyrene foams, 6:45

Solvents
resistance
plastics packaging, delivering the goods, **5**:29
treated HDPE containers, **4**:33
welding, how to bond polycarbonate parts, **6**:53
Spiral flow, honing molding parameters, flow length measurement, **6**:41
SPE: *see* Society of Plastics Engineers
SPI: *see* Society of the Plastics Industry
Stabilizers
additives, engineering resins, specialty applications, **6**:31
additives roundup, **2**:33
add-on mixers, extruder performance, **10**:39
quick test, polyethylene terephthalate, **2**:37
Stainless steel fibers, high-aspect ratio EMI fillers, **5**:39
Static electricity, antistats for polyolefins, ethoxylates, **8**:41
Styrene-butadiene graft, high-rubber MBS modifier, strong and clear PVC, **9**:45
Surface modifiers, additives roundup, **5**:43
Surface refinement, mass-finishing methods, **4**:37

T

Testing
gel permeation chromatography, troubleshooting urethanes, **10**:33
honing molding parameters, flow length measurement, **6**:41
injection-molded parts, **1**:43
resin processibility, viscosity ratio, polyethylenes, **12**:35
smoke-suppressant, PVC formulations, **1**:47
stabilizer action in PET, **2**:37
tensile, polyolefin thermoforming, setting conditions, **8**:53
Thermoforming
polyolefins, setting conditions, **8**:53
vacuum, thermoplastic vulcanizates, **9**:49
Thermoplastics
elastomers stretch design choices, **11**:37
liquid-crystal polymers, how to process, **12**:39
reinforced, additives roundup, **11**:43
Thermosets
engineering resins, new compact E/E designs, **1**:17
Regional Technical Conference, **2**:55
Titanium dioxide, additives roundup, **5**:43

U

Urethane
alternate adhesives, food-packaging laminates, **8**:61
testing and troubleshooting, gel permeation chromatography, **10**:33

V

Venting, melt devolatilization, choosing an extruder, **7**:47
Vibratory finishing, mass-finishing methods, refining plastic surfaces, **4**:37
Vinyl, Regional Technical Conference, **8**:97
Viscosity
honing molding parameters, flow length measurement, **6**:41
polycarbonate, coextruded sheets, **3**:67
ratio, resin processibility, polyethylenes, **12**:35
Vulcanizates, thermoplastic, vacuum thermoforming, **9**:49

W

Waste, ANTEC 1986, forum on technology, **7**:35
Weathering, color and, predicting the effects, **5**:35
Welding, solvent, how to bond polycarbonate parts, **6**:53
Weld lines, toughening, mica-reinforced PP parts, **7**:41
Wrapup
ANTEC 1986, forum on technology, **7**:35
Plastics South, Atlanta, **11**:47
reinforced plastics, record year, **4**:41

Z

Zinc/magnesium complex, PVC formulations, curbing smoke and flame, **1**:47
